## **Addendum to Pick Up & Delivery**

Due to the fluctuating cost of fuel, we have changed our pickup/delivery policy.

We will continue to pickup and deliver up to a 50 mile radius; however, we cannot pick up only one small item such as multi-meters, watt meters, torque wrenches, dial calipers and such. We would prefer that you ship these types of units to us. We will, in turn, ship them back to you and pay for the shipping cost as long as it does not exceed ten dollars (\$10.00).

We will pickup/deliver one or more larger items such as bench test sets, ramp test sets, radar test sets and/or a combination of large and smaller items.

We hope this change will not affect our relationship because we truly appreciate your business!

Sincerely,

The Management

### **CAUTION:**

When shipping equipment or tools it is not advisable to use Styrofoam peanuts. This shipping method **does not** protect the unit(s), it allows them to float around in the box and on several occasions we have seen equipment sticking out of the box upon arrival. This has resulted in **expensive repairs** that could have been avoided with proper packaging.
